7 March 2022

Dear Parent/Guardian,

COVID-19 vaccination for children aged 12 to 17 years of age

The **Covid 19** vaccination is being offered to all children in Year 7 to Year 13 who are aged 12-17 (up to the day of their 18th birthday) on the date of the session in school. Our team is scheduled to visit your child's school as part of this program. If you would like your child to receive this immunisation in school, please ensure you complete an online consent form.

How do I give my consent?

1. Go to <https://fx.hdfnhs.uk/CovidConsentForm/Covid19VaccinationConsent>
2. **139823** and click "**Find School**".
3. **Complete the form** with your child's information and parent/guardian contact information*.
4. Click the green "**Submit**" button.

Please note consents need to be submitted before 9am, 14th March 2022

*Following your child being vaccinated in school, they will be provided with a letter and additional information about post vaccination care. If your child has specific medical requirements one of our nurses may need to get in touch before we are due to visit school. We never pass on your contact information to third parties.

Once we have your consent, we will offer your child the vaccination at the school session.

We will not vaccinate children at the session in the following circumstances:

- When parents have not consented
- When children want to be vaccinated but parents have not consented
- When parents have consented and the child doesn't want it

Why is the Covid 19 vaccine being offered?

The main purpose of the COVID-19 school age vaccination programme is to provide protection to the children who receive the vaccine and may help to reduce transmission of COVID-19 in the wider population.

During the vaccination delivery we will maintain the range of measures we have in place to keep everyone safe from COVID-19.

If your child has tested positive for Covid-19, they should self-isolate and wait for 12 weeks before having their first or second dose. If they are unable to receive the COVID immunisation at the school session, you are now able to take your child to be vaccinated at a COVID vaccination centre.

How is the Covid 19 vaccine administered?

The vaccine is an intramuscular injection in the upper arm. At the session in school, we will always monitor a child for 15 minutes after administration of the vaccine to ensure support if they became unwell immediately after the vaccination.

The Pfizer BioNTech Covid 19 vaccine is used for this program, Comirnaty is the brand name for the Pfizer Covid-19 vaccine, it is exactly the same.
